EDUCATION

Tsinghua University, Beijing, China 08/2019 – 07/2023 (expected)

Institute for Interdisciplinary Information Sciences (Yao's Class)

- Selected to Tsinghua Xuetao Special Pilot CS Class, directed and founded by Prof. Andrew Yao.
- Admission granted from *Gold Medal* in Chinese Mathematics Olympiad 2018.
- Overall GPA: 3.87/4.00, TOEFL iBT: 106 (R30, L27, S22, W27).
- Specialized courses with A or A+: Introduction to AI, Introduction to Robotics, Abstract Algebra, Mathematics for Computer Science, Causal and Statistical Learning, Introduction to Databases, Artificial Intelligence: Principles and Techniques, Theory of Computation, Machine Learning, Operating System, etc.

Wuhan No.2 High School, Wuhan, China 08/2016 – 07/2019

Olympic Competition Class

- Member of the Chinese National Team in Russian Mathematical Olympiad.
- Member of the Chinese Training Team in International Mathematical Olympiad.
- Member of the Hubei Province Team in Chinese Mathematical Olympiad.

AWARDS

- **Best Paper Award, CSoNet 2021 (top 1 in all accepted papers)** 11/2021
- **Social Practice Excellence Award, Tsinghua University (awarded to students active in social practice)** 10/2021
- **Science and Technology Innovation Excellence Award, Tsinghua University (awarded to students active in science and technology)** 10/2021
- **Top Grade Prize of 39th Challenge Cup, Tsinghua University (top 6 in about 200 teams)** 04/2021
- **Comprehensive Excellence Award, Tsinghua University (awarded due to top 30% GPA in Yao Class and prominent comprehensive ability)** 10/2020
- **Freshman Scholarship, Tsinghua University (awarded to about 5% of students)** 10/2019
- **Silver Medal in Russian Mathematical Olympiad (Chinese national best in the 11th grade group until now)** 04/2019
- **Chinese Mathematical Olympiad Gold Medal (top 60 in 388 competitors)** 11/2018
- **Three First Prizes in Chinese National High School Mathematics Contest** 10/2016, 10/2017, 10/2018

PUBLICATIONS

Causal Inference for Influence Propagation – Identifiability of the Independent Cascade Model

Shi Feng, Wei Chen.

Accepted by The 10th International Conference on Computational Data and Social Networks (**Best Paper Winner**).
[ArXiv Full Version] [View Publication]

Combinatorial Causal Bandits

Shi Feng, Wei Chen.

Under Review by The 39th International Conference on Machine Learning.

EXPERIENCES

Research Intern, Microsoft Research Asia 10/2020 – 01/2022

Star of Tomorrow Internship Program

- Topic: Social Network and Causal Inference Theory.
- Mentor: Prof. Wei Chen.
- Understood and done detailed surveys on documents related to identifiability, and rewrote a pellucid proof of completeness of the do-calculus algorithm. Solved the identifiability problems of the independent cascade model for some structures and gave groundbreaking results.

- Came up with and provided theoretical promised algorithms for a new online learning framework – combinatorial causal bandits.

Research Intern, Harvard University

02/2022 – 08/2022 (expected)

Harvard School of Engineering

- Topic: Algorithmic Game Theory and Predicting Markets.
- Mentor: Prof. Yiling Chen.

SKILLS

- **Programming Languages:** Python, C/C++, Golang, Mathematica, SQL, R, Verilog, Bash, HTML/CSS (ranked by proficiency).
- **Tools and Frameworks:** Git, $\LaTeX$, PyTorch, Keras, Matplotlib, MySQL.
- **Languages:** Chinese (native language), English (fluent, 106 in TOEFL iBT).
- **Hobbies:** Soccer (member of the faculty soccer team), Movie, Traveling.
